

The background is black with several glowing blue dots and a complex network of thin, light blue lines that form a large, irregular shape. The lines are more densely packed in some areas, creating a sense of movement and connectivity. There are three main glowing dots: one at the top right, one in the middle right, and one at the bottom left. The lines seem to originate from or converge towards these points.

Invitation to the public defense
of my PhD thesis

**Trajectory Generation for Mobile
Manipulators with Differential Geometry**

11 December 2024
Defense: 17:30
Layperson's talk: 17:00
Senaatszaal
Aula Conference Center
TU Delft
